34. Board of Education Director District Reapportionment - First Review/Reading

RECOMMENDATION: Information only.

- Attachment 1: Director District Without Residences
- Attachment 2: Board Letter Director District Reapportionment

Every four years, school districts having a director district plan of representation must determine the population in each of the director districts and, if each director district does not contain substantially the same number of persons as each of the other director districts, the school board has a duty to revise the districts to comply with the specifications in C.R.S. 22-31-110. In accordance with the statute, reapportioned districts shall be contiguous, compact, and as nearly equal in population as possible, the number of director districts should not be changed, and shall be completed no later than December 31st, 2024.

The last reapportionment of director districts was made in 2020. Accordingly, the district's consultant, Western Demographics Inc. (WDI), has evaluated director district populations and determined reapportionment is necessary.

Shavon Caldwell, DCSD's Planning Manager, and WDI discussed three redistricting scenarios. All scenarios equalize population between the districts and minimize change to preserve the historic pattern of representation. Additionally, all scenarios address growth, do not displace seated directors and comply with State statutes.

The Board expressed a general preference for Scenario #3, which represents the best retention of long-term representation patterns while achieving the requirements of the statute to balance population. A second and final reading of the Boards' preferred reapportionment scenario will be placed on the December 10, 2024 Consent Agenda for Board approval.
