CONDUCTED: MARCH 25-27, 2024

17A. With no expected increase in the district's current bond fund tax rate of 5.2 mills and based on the district's current assessed value and tax collection rate, shall Douglas County School District debt be increased \$430 million dollars with a repayment cost of \$755 million dollars, and shall the district be authorized to collect taxes in the amount of \$48 million dollars annually to pay such debt, all for the purpose of:

- Addressing a maintenance and repair backlog that includes urgent repairs to mechanical and electrical systems, roofs,
- Implementing safety and security upgrades at every school
- Constructing and equipping two new neighborhood schools and additions to one existing neighborhood school to accommodate growth....
- Funding for urgent needs to support special education, information technology, athletic and activity upgrades, and buses
- Enhancing the District's career and technical education offerings for students

The district built over thirty schools from 1998 to 2008 by consistently passing bonds every three to four years. However, only once in the last 18 years have voters approved a bond measure to address maintenance, and repairs. The average age of Douglas County School buildings is now 20-30 years old, which means many of their systems are now due for replacement.

23. Now, you are going to read some brief statements that you might hear about the bond proposal. For each statement, please tell me whether this information would make you more likely to vote for or against the bond proposal, or if it makes no difference either way.

The district built over thirty schools from 1998 to 2008 by consistently passing bonds every three to four years. However, only once in the last 18 years have voters approved a bond measure to address maintenance, and repairs. The average age of Douglas County School buildings is now 20-30 years old, which means many of their systems are now due for replacement.

The district built over thirty schools from 1998 to 2008 by consistently passing bonds every three to four years. However, only once in the last 18 years have voters approved a bond measure to address maintenance, and repairs. The average age of Douglas County School buildings is now 20-30 years old, which means many of their systems are now due for replacement.

29. Now, you are going to read some brief statements that you might hear about the bond proposal. For each statement, please tell me whether this information would make you more likely to vote for or against the bond proposal, or if it makes no difference either way.

Passing such a bond -- up to \$490 million dollars -- would not raise the property tax rate you are paying today for schools.

33. I am going to read you two points of view about the bond proposal, and please tell me which one you agree with more...
 (Some/Other) people say the District failed in its last two attempts to pass a bond measure, because we cannot continue to strap our future generations with more and more debt. The District should live within its means and accept the will of the voters -- 'no' means 'no' - especially considering that districtwide student enrollment has declined for two years in a row.

...while...

(Some/Other) people say that the District's aging infrastructure, repair backlog, safety and security needs will become more urgent and expensive over time. Our property values will stay high as long as we continue to invest in our school system. Every Douglas County student and resident deserves a quality school in their community, which we cannot provide without a voter-approved bond measure.  (Some/Other) people say the District failed in its last two attempts to pass a bond measure, because we cannot continue to strap our future generations with more and more debt. The District should live within its means and accept the will of the voters -- 'no' means 'no' - especially considering that districtwide student enrollment has declined for two years in a row.
 ...while...
 (Some/Other) people say that the District's aging infrastructure, repair backlog, safety and security needs will become more urgent and expensive over time.
