23.A I am going to read you two points of view about the bond proposal, and please tell me which one you agree with more...ROTATE

(Some/Other) people say the District failed in its last two attempts to pass a bond measure, because we cannot continue to strap our future generations with more and more debt. The District should live within its means and accept the will of the voters – “no” means “no” – especially considering that districtwide student enrollment has declined for two years in a row.

...while...

(Some/Other) people say that the District’s aging infrastructure, repair backlog, safety and security needs will become more urgent and expensive over time. Our property values will stay high as long as we continue to invest in our school system. Every Douglas County student and resident deserves a quality school in their community, which we cannot provide without a voter-approved bond measure. Additionally, we can do this **without an increase** in the tax rate we are paying for schools today.
