Also, will you have qualified applicants to go up against him for the job. When Dr. Tucker was hired he was up against someone who wasn't even qualified for the job.

15	Taylor Short	Highlands Ranch	taylor.j.short@gmail.com	Getting our kids back in school in person now. We need to get our children back in person now. We have almost a year of data and the death rate is extremely low. It is clear at this point, even with a vaccine, we are not eradicating this and must move on with life. The longer we keep our children out of school, the more their learning and mental health suffers. They are falling behind in social situations and need to get back to school. They are eager to go back and as adults, we must speak up for them. For a population widely unaffected, we need to get them back to normal. Governor Polis is pushing for schools to be back in person, so it is up to the board to make this call.
